To whom it may concern;

In 2016 I was referred to Chrissy Benoit to help me with multiple projects to improve my business. I was not sure where to start but I knew where I wanted to go. Chrissy Benoit helped me get there and educated me on the process. Now my quaint little café has the correct food license, (I had the incorrect one before and got violations) It has zoning for more seats inside, which allowed us to get our Beer and Wine or 2COP license for the nightly workshops we provide. It has a sidewalk seating permit as well. Now our workshops are more profitable, the café can produce food we are excited to sell and the business is more what I imagined it would be.

In this process there were many hurdles, with regard to food certifications, remodeling for the food prep area and proper items in the restrooms. Chrissy did our drawings for us, was onsite with the health inspector, handled zoning and licensing paperwork and made this challenging process one we could navigate.

We are very happy we met her and know we can call her anytime we need someone to help us cut through the confusion that sometimes this business can create. We highly recommend her for her knowledge as well as her patience and persistence in helping us get to the finish line. That being said we have a huge language barrier and Chrissy always found a way to translate so we could stay on the same page, I was never in the dark even though we spoke different languages!

Kind regards,

Paola Bornacelli
